

Prompt Library v1 — Customer Support Replies

Week 1 · Generative AI & Prompt Engineering — NeuroFive Solutions Internship

1. Why a Prompt Library?

Professional prompt engineers don't rewrite prompts from scratch. They build reusable templates with placeholders — the same way developers write functions instead of copy-pasting code. Swap the variables, keep the structure, get consistent results every time. Use case chosen: **customer support replies**.

2. The Reusable Template

```
ROLE: You are a {tone} customer support agent for {company_type}.
CONTEXT: A customer has contacted us about: {situation}
TASK: Write a reply email that {goal}.
FORMAT: {format_requirements}
CONSTRAINTS: {constraints}
```

Placeholder	What it controls
{tone}	Personality of the reply (empathetic, professional, calm, friendly, warm)
{company_type}	Business context the AI should assume
{situation}	The customer's actual issue
{goal}	What the reply must achieve
{format_requirements}	Length, structure, subject line, etc.
{constraints}	Hard rules the reply must never break

3. Five Prompts from One Template (with Tested Outputs)

All outputs below are real, generated by running each prompt in Claude.

Prompt 1 — Late Delivery Apology

```
ROLE: You are an empathetic customer support agent for an online clothing store.
CONTEXT: A customer has contacted us about: their order arriving 2 weeks late.
TASK: Write a reply email that sincerely apologizes and offers a 15% discount code on their next purchase.
FORMAT: Under 120 words, include a subject line.
CONSTRAINTS: No excuses about shipping partners, no corporate jargon.
```

Tested Output:

Subject: We're Sorry About Your Late Order

Hi there,

I'm truly sorry your order took two weeks to arrive — that's far longer than you should ever have to wait, and I understand how frustrating that is.

As a small way of making it right, here's a 15% discount code for your next purchase: **SORRY15**. It's valid for the next 60 days with no minimum spend.

If anything about the order itself isn't perfect, just reply to this email and I'll sort it out personally.

Thank you for your patience with us.

Warmly, Maya — Customer Support

Prompt 2 — Refund Outside Policy Window

```
ROLE: You are a professional customer support agent for a software company.
CONTEXT: A customer has contacted us about: wanting a refund 20 days after
```

purchase, but our refund policy is 14 days.
TASK: Write a reply email that politely declines the refund but offers 3 months of free subscription instead.
FORMAT: Three short paragraphs.
CONSTRAINTS: Never use the word "unfortunately", keep the tone positive.

Tested Output:

Hi Jordan,

Thank you for reaching out about your refund request. I've looked into your account, and since the purchase was made 20 days ago, it falls outside our 14-day refund window, which means I'm not able to process a refund in this case.

That said, I'd genuinely like to make this right for you. I've added **3 months of free subscription** to your account, effective immediately — no action needed on your side.

If there was something specific that wasn't working for you, I'd love to hear it — your feedback goes straight to our product team.

Best regards, Sam — Customer Support

Prompt 3 — Angry Double-Charge De-escalation

ROLE: You are a calm senior customer support agent for an electronics store.
CONTEXT: A customer has contacted us about: being charged twice for one order and they are very angry.
TASK: Write a reply email that de-escalates and confirms the refund within 3-5 business days.
FORMAT: Under 100 words.
CONSTRAINTS: The first sentence must acknowledge their frustration.

Tested Output:

Hi Alex,

You're completely right to be upset — being charged twice is unacceptable, and I'm sorry this happened.

I've confirmed the duplicate charge on your account and initiated a full refund of the second payment. You'll see it back on your card within **3-5 business days**. I've also flagged this with our billing team to prevent it from recurring.

Your refund reference is #RF-20847 — keep it handy, though I'll be watching this one personally.

Thank you for your patience, Rina — Senior Support

Prompt 4 — Password Reset Instructions

ROLE: You are a friendly customer support agent for a mobile app.
CONTEXT: A customer has contacted us about: not being able to reset their password.
TASK: Write a reply email that gives clear step-by-step reset instructions.
FORMAT: Numbered steps, maximum 5 steps.
CONSTRAINTS: Assume the user is not technical — no jargon.

Tested Output:

Hi Priya,

No worries — resetting your password only takes a minute. Here's how:

1. Open the app and tap "Forgot Password?" on the login screen.
2. Type in the email address you signed up with and tap Send.
3. Check your inbox for a message from us (peek in spam if it's not there).
4. Tap the blue "Reset My Password" button in that email.
5. Choose a new password and you're back in!

If the email doesn't arrive within 10 minutes, just reply here and I'll reset it manually.

Happy to help, Omar — Support Team

Prompt 5 — Responding to Praise

ROLE: You are a warm customer support agent for a food delivery service.
CONTEXT: A customer has contacted us about: praising their delivery driver Ali for excellent service.
TASK: Write a reply email that thanks them and lets them know the feedback will

be shared with Ali.
FORMAT: 3-4 sentences.
CONSTRAINTS: No promotional offers, keep it human and genuine.

Tested Output:

Hi Fatima,
Thank you so much for taking the time to write this — messages like yours honestly make our day. I've passed your kind words directly to Ali and his team lead, and I know it will mean a lot to him. We're lucky to have drivers like Ali, and customers like you who notice. Wishing you a great week!
Warm regards, Zara — Customer Care

4. Key Takeaway

One template produced five completely different, high-quality replies just by swapping six variables. The structure does the heavy lifting: **Role** sets the voice, **Context** grounds the situation, **Task** defines success, **Format** controls the shape, and **Constraints** prevent the failure modes that matter most (like saying "unfortunately" in a decline email — Prompt 2's output respected this perfectly). This is Prompt Library v1; future versions can add variables for language, urgency level, and customer history.

5. Submission Checklist

- ✓ Use case chosen: customer support replies — Done
- ✓ Reusable template designed (Role + Context + Task + Format + Constraints) — Done
- ✓ 5 prompts created from the same template — Done
- ✓ All 5 tested and outputs saved — Done
- ✓ Packaged as Prompt Library v1 (Word doc + markdown) — Done
- ☐ 2–3 min video demoing the template and 2 prompts live
